

The University of Georgia is located in the foothills of the Southern Appalachian Mountains, in Athens, GA. The University is approximately an hour northeast of Atlanta, 2.5 hours south of Cherokee, NC and 4 hours from the Atlantic Ocean.

UGA is the birthplace of public higher education in America – chartered in 1785 to launch our nation’s great tradition of world-class public education. What began as a commitment to inspire the next generation grows stronger today through global research, hands-on experiential learning and extensive outreach. One of America’s “Public Ivies” and a top 10 best value in public higher education, the University of Georgia tackles some of the world’s grand challenges – from combating infectious disease and securing the world’s food supply to advancing economic growth and analyzing the environment.

The College of Environment and Design (CED) and the Institute for Native American Studies (INAS) are both recognized as top programs in the United States. We value connections to the ecology and cultures of our regions and seek to enhance and preserve healthy and resilient communities through thoughtful preservation, planning, design and management.

Certificate in Native American Studies

Master of
**LANDSCAPE
ARCHITECTURE**

Master of
**HISTORIC
PRESERVATION**

**UNIVERSITY OF
GEORGIA**

**Certificate in
NATIVE AMERICAN STUDIES**

The Institute of Native American Studies (INAS) at the University of Georgia is one of the leading programs in Indigenous studies in the country and the premier program in the American South. We are a vibrant community of two dozen scholars, including six Native faculty, in addition to our graduate and undergraduate students. Each year, we bring prominent figures in Native American and Indigenous studies and in the Indigenous Americas, representing a wide variety of endeavors, to campus to speak. INAS supports the research of its faculty and graduate students, and we partner with tribal nations and other community organizations on a variety of significant research and service projects. INAS offers both an undergraduate and a graduate certificate in Native American Studies. In addition, it has four specialized tracks in historic preservation, landscape architecture, public health, and Indigenous Latin America.

Master of LANDSCAPE ARCHITECTURE

The Master's Degree in Landscape Architecture (MLA) at the University of Georgia's College of Environment and Design provides the foundational knowledge, practical skills and design expertise needed to engage in both public service and private practice of landscape architecture. Students in our program develop the knowledge, skills and values necessary create design solutions for communities that enhance human health, environmental quality and economic value. In addition, students have the opportunity to focus and define their unique position within the profession through scholarly discovery and extracurricular experiences. The CED's MLA program graduates students who are prepared to contribute to their communities as outstanding practitioners, educators and scholars in the planning, design, and management of the natural and built environment.

Master of HISTORIC PRESERVATION

The Master of Historic Preservation (MHP) program prepares students for broad-based careers in the conservation and management of historic resources in both the built and natural environments. The two-year MHP degree is structured to develop versatile, competent, and highly motivated professionals who can perceive preservation opportunities in the broadest sense and who can develop strategies ensuring the protection and use of cultural resources as a part of the fabric of urban and rural environments. An accelerated MHP degree, a joint Juris Doctor and MHP, and a Historic Preservation certificate are also available.
