Introduction

The College of Environment and Design (CED) is nationally recognized for its innovation in design, planning, and preservation. While CED was established as an academic unit of the University of Georgia in 1969, landscape architecture courses have been taught at UGA since 1928, making our landscape program one of the oldest in the country. Today, CED’s landscape architecture is one of the largest and most prestigious programs in the US, at both undergraduate (BLA) and graduate (MLA) levels. In 2019, the BLA was ranked #4 in the country and the MLA #10. CED also offers degrees in historic preservation (MHP), one of the largest programs of its kind in the country and oldest in the South; urban planning and design (MUPD), which is ten-years old and has a unique focus on physical planning amidst peer programs; and a new interdisciplinary Ph.D. CED has the oldest environmental ethics certificate in the country and the oldest joint degree between law and historic preservation. It participates in a plethora of other joint degrees, double dawgs, minors, and certificate programs across campus.

CED is a professional school. Our landmark characteristic is the integration of arts/design-based solutions with science- and evidence-based solutions, which holistically address society’s most urgent, contemporary, real-life problems. The college is a leader in design and planning for sustainability and resiliency.

Another landmark characteristic is high student and faculty engagement with communities through coursework, research, and outreach. CED has an especially strong commitment to underserved populations. We deliver high-quality design and planning services to communities across Georgia, especially those with underserved populations, thus allowing opportunities they could not otherwise afford. Much of this work is led by CED’s Center for Community Design and Preservation (CCDP). Ultimately, through synergistic arts/science problem-solving and community engagement, we create exceptional value in our students. They enjoy rich theoretical and practical experiences that make them highly prepared for the professional fields. Their reputation as they join the professional world is a strong measure of CED’s success.

The college has a deep commitment to institutional and social diversity and inclusion. Its current diversity and inclusion plan will expire next year. A new, broad-based committee will be formed to re-envision CED’s commitment. The new diversity and inclusion plan will then get integrated into the strategic plan.

---

1 The strategic plan was prepared by a committee of faculty, staff, alumni, and students, after gathering wide input. It was in near-final form before COVID-19. In consideration of the pandemic potential long-term budget effects, we have revised some of our goals and strategies in the direction of strengthening off-campus instruction, research, and service, and finding new ways to deal with budget constraints.
Vision Statement

The College of Environment and Design strives to be a renowned professional school of design, planning, and preservation by contributing to understanding, managing, and shaping the built environment through teaching, research, and service.

Mission Statement

The College of Environment and Design pursues its vision through three interrelated actions:

TEACHING
We equip future leaders in landscape architecture, historic preservation, and urban planning and design with critical thinking, creative design and management skills, using innovative experiential-learning pedagogies.

RESEARCH
We author research-based creative work that advances our understanding and management of the places we live in today to ensure our sustainable future.

SERVICE
We apply our pedagogy, research, and creative practices to collaborative community service for the benefit of students and society at large.

I: Promoting Excellence in Teaching & Learning

Strategic Goal 1.1: Expand experiential learning opportunities for all students.

Unit Goal 1.1:
Enhance the EL component of learning in and outside the classroom. The college is already a leader in experiential learning: all our undergrad students are required to complete an internship as part of their degree and 60-70% of them participate in experiential learning beyond the internship. CED will leverage opportunities for students’ exposure to a wide range of EL opportunities by connecting with professional practices, as well as community engagement and design research.

KPI 1.1: Opportunities available for course-based, credit-eligible experiential learning and for experiential learning occurring outside the credit-bearing coursework.
