

Catoosa County, Georgia

Findings

The Center for Community Design and Preservation (CCDP) located within the University of Georgia’s College of Environment + Design (CED) conducted a Phase I historic resource survey of Catoosa County, Georgia in July and August of 2005. The project area covered the approximately 160 square miles of unincorporated land within county limits. The county is bordered by Hamilton County, Tennessee to the north, Whitfield County to the east, and Walker County to the west. The resource survey was performed by graduate students in the Masters of Historic Preservation program (MHP) and the Masters of Landscape Architecture program (MLA) at the CED. The survey consisted of background research, windshield and pedestrian field work, data collection and analysis.

Summary

A total of 194 resources were documented that meet and maintain a minimum level of age, integrity, and significance. The construction date of all identified resources range from 1830-1943. The period with the most extant resources is 1920-1929 with 31 resources (16%) followed by 1900-1909 with 18 (9.3%). The majority of the other resources are from the few decades immediately before or after these years. Of the resources, 155 are buildings and 39 are burial sites. From the buildings surveyed, 16 are vacant, 120 are single family dwellings, 4 are stores, and 2 are religious facilities. There are two examples each of Colonial Revival, Greek Revival, and Italianate styles while the remaining were classified as either Craftsman (28) or Folk Victorian Revival (20). 66 single family dwellings did not exhibit any type of High Style architecture, and are considered to be of no academic style.

Field Surveyors:

Gwen Jones, Kristie Lockerman, Thomas Peters, and Chip Wright
