

Glascocock County, Georgia

Findings

The Center for Community Design and Preservation (CCDP) located within the University of Georgia’s College of Environment + Design (CED) conducted a Phase I historic resource survey of the Glascock County, Georgia in January 2011. The project area covered the approximately 141 square miles. Glascock county is located in the Central Savannah River area. It is bordered by Warren County to the north, Hancock County to the east, Washington County to the southeast, and Jefferson to the Southwest.

The resource survey was performed by historic preservation professionals, and graduate students in the Masters of Historic Preservation program (MHP) and the Masters of Landscape Architecture program (MLA) at the CED. The survey consisted of background research, windshield and pedestrian field work, data collection and analysis.

The information collected by the field survey was entered into Georgia’s Natural, Archaeological, and Historic Resources Geographical Information System (GNARHGIS) which is the repository for all of the current statewide historic resources survey data. The information was entered under ID 2396.

Summary

A total of 28 resources were documented that meet and maintain a minimum level of age, integrity, and significance. The construction date of all identified resources range from 1834 to 1935. The variance in building type and architectural styles exhibited throughout Glascock County is typical for agrarian towns in Georgia. The majority of identified resources are single family dwellings (60.7%), with the most common types being the Folk Victorian (16.7%) and the Craftsman (22.2%). The majority of all resources (55.5%) did not exhibit any type of High Style architecture, and are considered to be of no academic style.

Field Surveyors: Claire Cothran and Anna Gore
