

# Putnam County, Georgia

## Findings

The Center for Community Design and Preservation (CCDP) located within the University of Georgia’s College of Environment + Design (CED) conducted a Phase I historic resource survey of Putnam County, Georgia in June 2003. The project area covered the approximately 340 square miles of unincorporated land within county limits. The county is bordered by Morgan, Greene, Hancock, Baldwin, Jones, and Jasper Counties. It also contains a portion of the Oconee National Forest. The resource survey was performed by graduate students in the Masters of Historic Preservation program (MHP) and the Masters of Landscape Architecture program (MLA) at the CED. The survey consisted of background research, windshield and pedestrian field work, data collection and analysis.

## Summary

A total of 269 resources were documented that meet and maintain a minimum level of age, integrity, and significance. The construction date of all identified resources range from 1804-2006. The period with the most extant resources is 1910-1919 with 61 resources (22.7%) followed by 1930-1939 with 51 (19%). The majority of the other resources are from the few decades immediately before or after these years. Of the resources, 242 are buildings, 24 are burial sites, 2 are structures, and 1 is a landscape feature. From the buildings surveyed, 40 are vacant, 180 are single family dwellings, 2 are public works, and 16 are religious facilities. The styles found in this survey are numerous and greatly varied. Examples included Colonial Revival (4), Craftsman (16), Folk Victorian Revival (11), Greek Revival (10), and one example of both Queen Anne and Neoclassical Revival. A majority of single family dwellings (135) did not exhibit any type of High Style architecture, and are considered to be of no academic style.

### Field Surveyors:

David Elden, Nancy Kelly, Erin Simmons, Michelle Volkma
