Georgia Historic Resource Survey Partnership

Wilkinson County, Georgia

Findings

The Center for Community Design and Preservation (CCDP) located within the University of Georgia’s College of Environment + Design (CED) conducted a Phase I historic resource survey of Wilkinson County, Georgia in August 2011. The project area covered approximately 225 square miles within county limits of unincorporated land. The county is approximately 15 miles east of Macon. It is bordered by Baldwin to the north, Bleckley to the south, Johnson to the east, and Twiggs to the southwest. The resource survey was performed by graduate students in the Masters of Historic Preservation program (MHP) and the Masters of Landscape Architecture program (MLA) at the CED. The survey consisted of background research, windshield and pedestrian field work, data collection and analysis.

Summary

A total of 78 resources were documented that meet and maintain a minimum level of age, integrity, and significance. The construction date of all identified resources range from 1780-1954; the period with the most extant resources is from 1910-1919 with 13 (16.6%), followed by 1880-1889 and 1890-1891 that each had 9 (11.5%). The majority of identified resources are cemeteries (64%), followed by single family dwellings (24.4%), vacant/not in use buildings (7.7%), and religious buildings (4%). Of the buildings that were surveyed the vast majority (75%) did not have any style. 18% could be classified as folk victorian and 14% were craftsman.
