

A. Kaltura within eLC

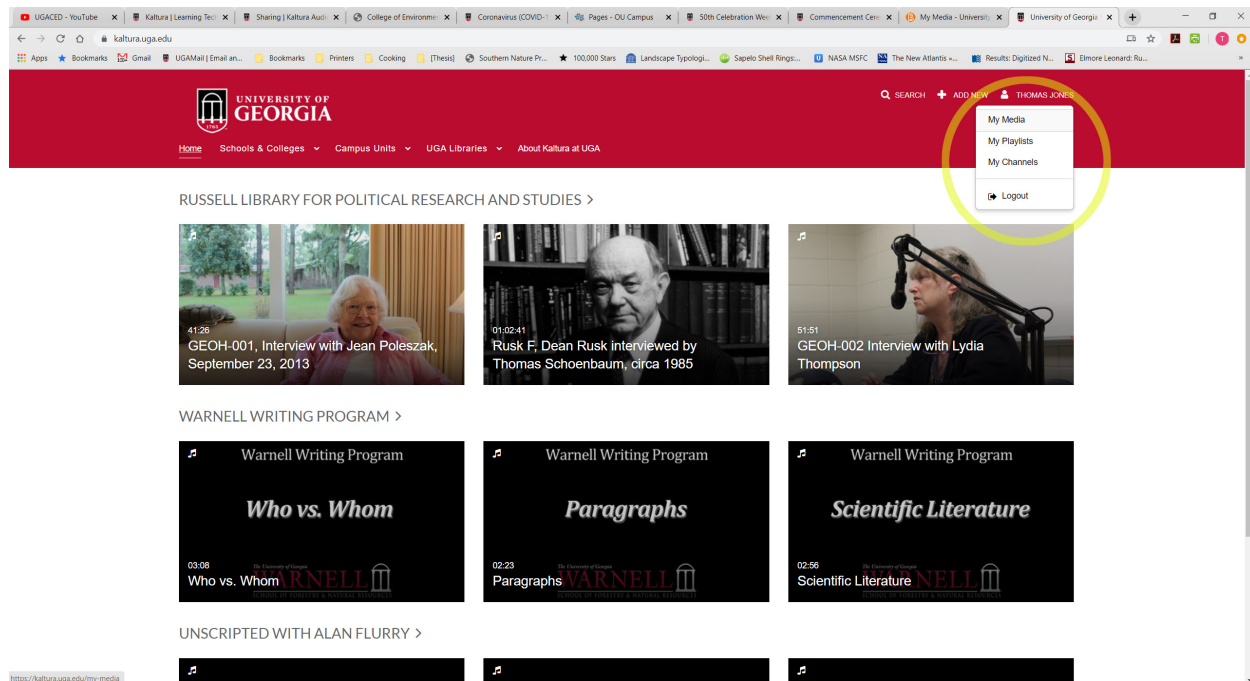

Kaltura is a media storage and streaming solution offered by UGA, and integrated within eLC. Kaltura allows you to record or upload video, for sharing in general or for including on eLC. You can record using your webcam, or you can record your desktop (desktop capture), both with your voice over audio via your microphone. Desktop capture is a great option for the creation of instructional videos that follow along as you demonstrate tasks. For example, in digital graphics, we will be using capture to record live instruction in Sketch Up, Photoshop, and InDesign, and hosting it on eLC as short videos for students to watch asynchronously.

Detailed, step-by-step instructions are found here: <https://help.elc.uga.edu/faculty/kaltura-audio-and-video/> In this instruction set, you'll learn how Kaltura integrates with eLC, where you access videos in "My Media." You'll find instructions on recording your desktop, and sharing what you have recorded.

B. Kaltura.uga.edu

Kaltura can also be accessed outside of eLC, and offers more sharing options outside of your eLC class. For example, the instructions below are for recording a video, then sharing as a link to your or someone else's eLC class.

1. Go to <https://kaltura.uga.edu/>. Login at the top right corner.

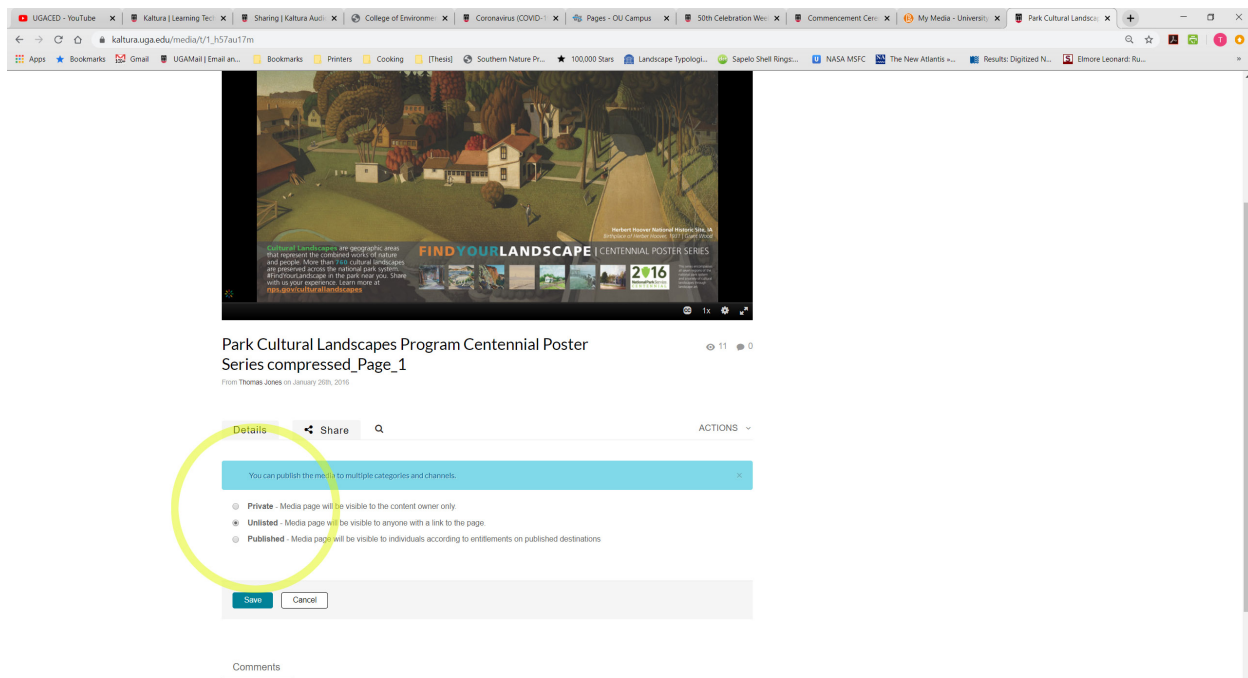

2. Once logged in, click your name to access My Media, the same My Media as you see in eLC.

The screenshot shows the Kaltura media interface for the University of Georgia. At the top, there's a navigation bar with the University of Georgia logo and links to Home, Schools & Colleges, Campus Units, UGA Libraries, and About Kaltura at UGA. A search bar and a user profile for Thomas Jones are also present. A yellow circle highlights the 'ADD NEW' button, which has a dropdown menu with options: Media Upload, Express Capture, YouTube, and Kaltura Capture. Below this, there are three video thumbnails: 'GEOH-001, Interview with Jean Poleszak, September 23, 2013', 'Rusk F. Dean Rusk interviewed by Thomas Schoenbaum, circa 1985', and 'GEOH-002 Interview with Lydia Thompson'. Further down, there are three more thumbnails for the 'Warnell Writing Program': 'Who vs. Whom', 'Paragraphs', and 'Scientific Literature'. At the bottom, there's a section for 'UNSCRIPTED WITH ALAN FLURRY' with three more video thumbnails.

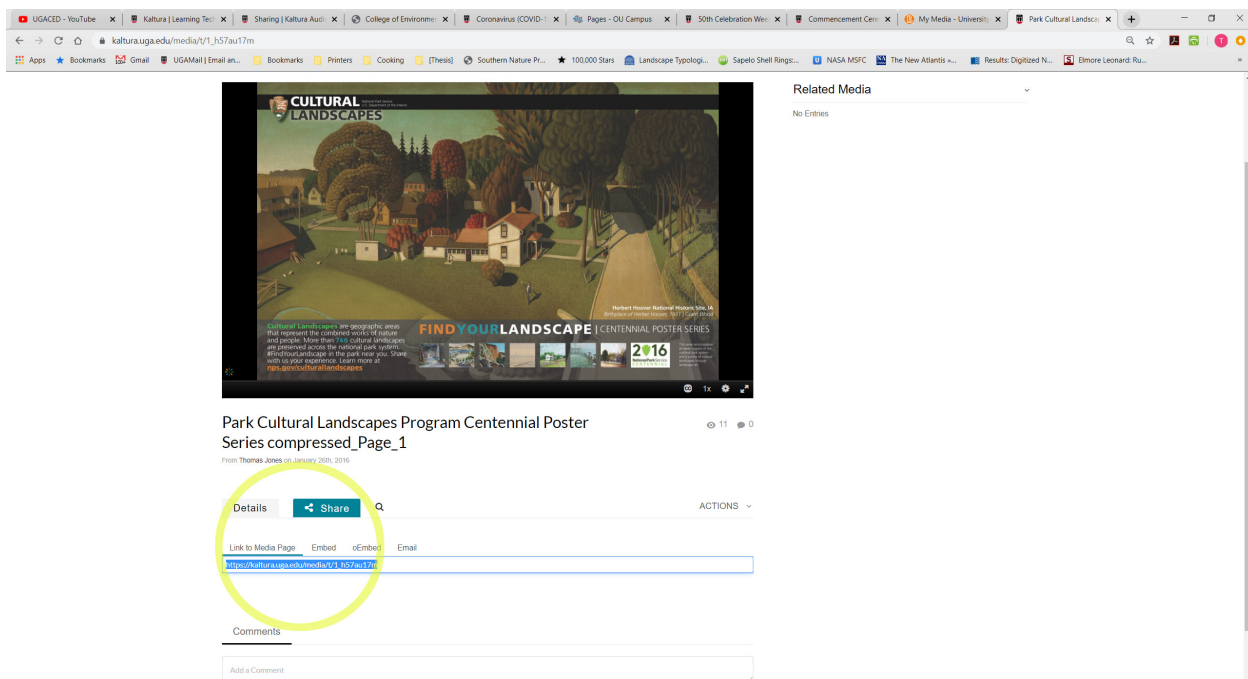

- Just as in eLC, you can click Add New to upload media from another source, or to capture your desktop. Use Kaltura Captura to capture your desktop.

The screenshot shows a video titled 'Park Cultural Landscapes Program Centennial Poster Series compressed_Page_1' by Thomas Jones, uploaded on January 26th, 2016. The video thumbnail shows a landscape with houses and trees. To the right of the video, there's a 'Related Media' section with 'No Entries'. Below the video, there's a 'Details' tab and a 'Share' button. A yellow circle highlights the 'ACTIONS' menu, which has options: Edit, Publish, Add to playlist, Analytics, and Delete. The video is currently in a 'Test' state.

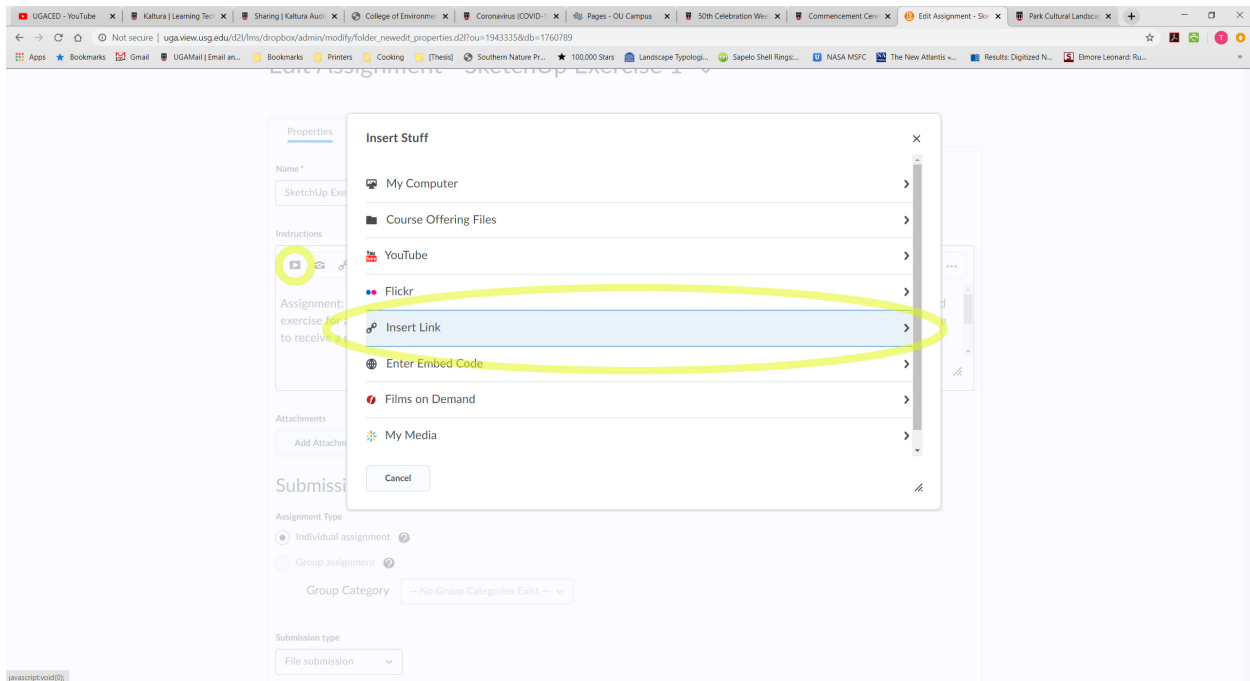

- Once recorded, a video must be published.

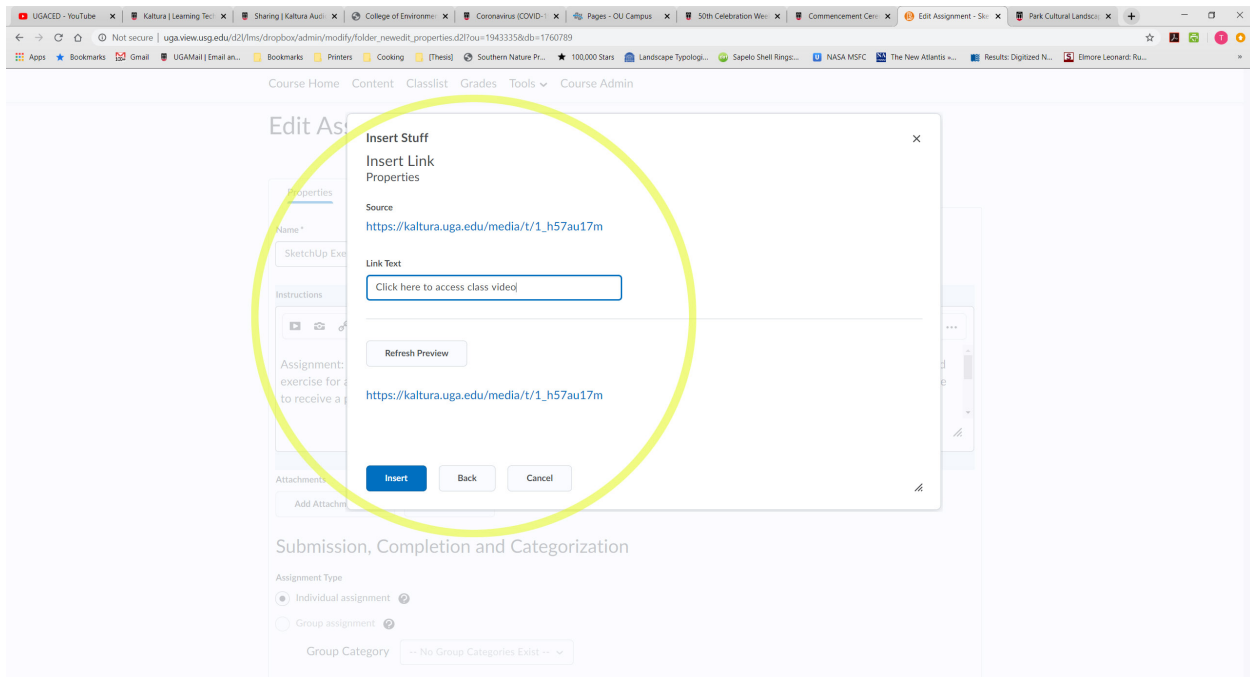

5. To share, the video should be published as Unlisted or Published media.

6. Once published, the video can be Shared via a link

7. To add the link to an eLC class, go to an assignment, discussion, or other module, and click Insert Stuff (looks like a youtube icon), then Insert Link

8. Paste the url, then enter Link Text (i.e. what students will see that prompts them to click the link to open the video) If prompted, you may need to enable to Open External option. If that shows under Link Text, then enable it.
