iPad kit for presentations, crits, interviews, etc.
iPad, directional microphone, multi-position tripod (Available for check-out as a kit)

This kit can be useful to capture or share crits, presentations, interviews, etc.

Use the Zoom app on the iPad to connect to meetings. The built-in microphone will work for most purposes, with the addition of the directional condensor microphone enabling higher quality audio capture, with less background audio intrusion. The tripod can arranged so that desktop views are shared.

Be sure the iPad is fully charged, particularly for longer meetings, as the microphone is powered by the iPad.
